

I used Machine Learning to predict the FIFA World Cup 2026

MODEL'S CHAMPION PICK

 **France**

19.8% champion probability
(10,000 Monte Carlo simulations)

62.1%

Model Accuracy

30

Engineered Features

49,490

Matches Analyzed

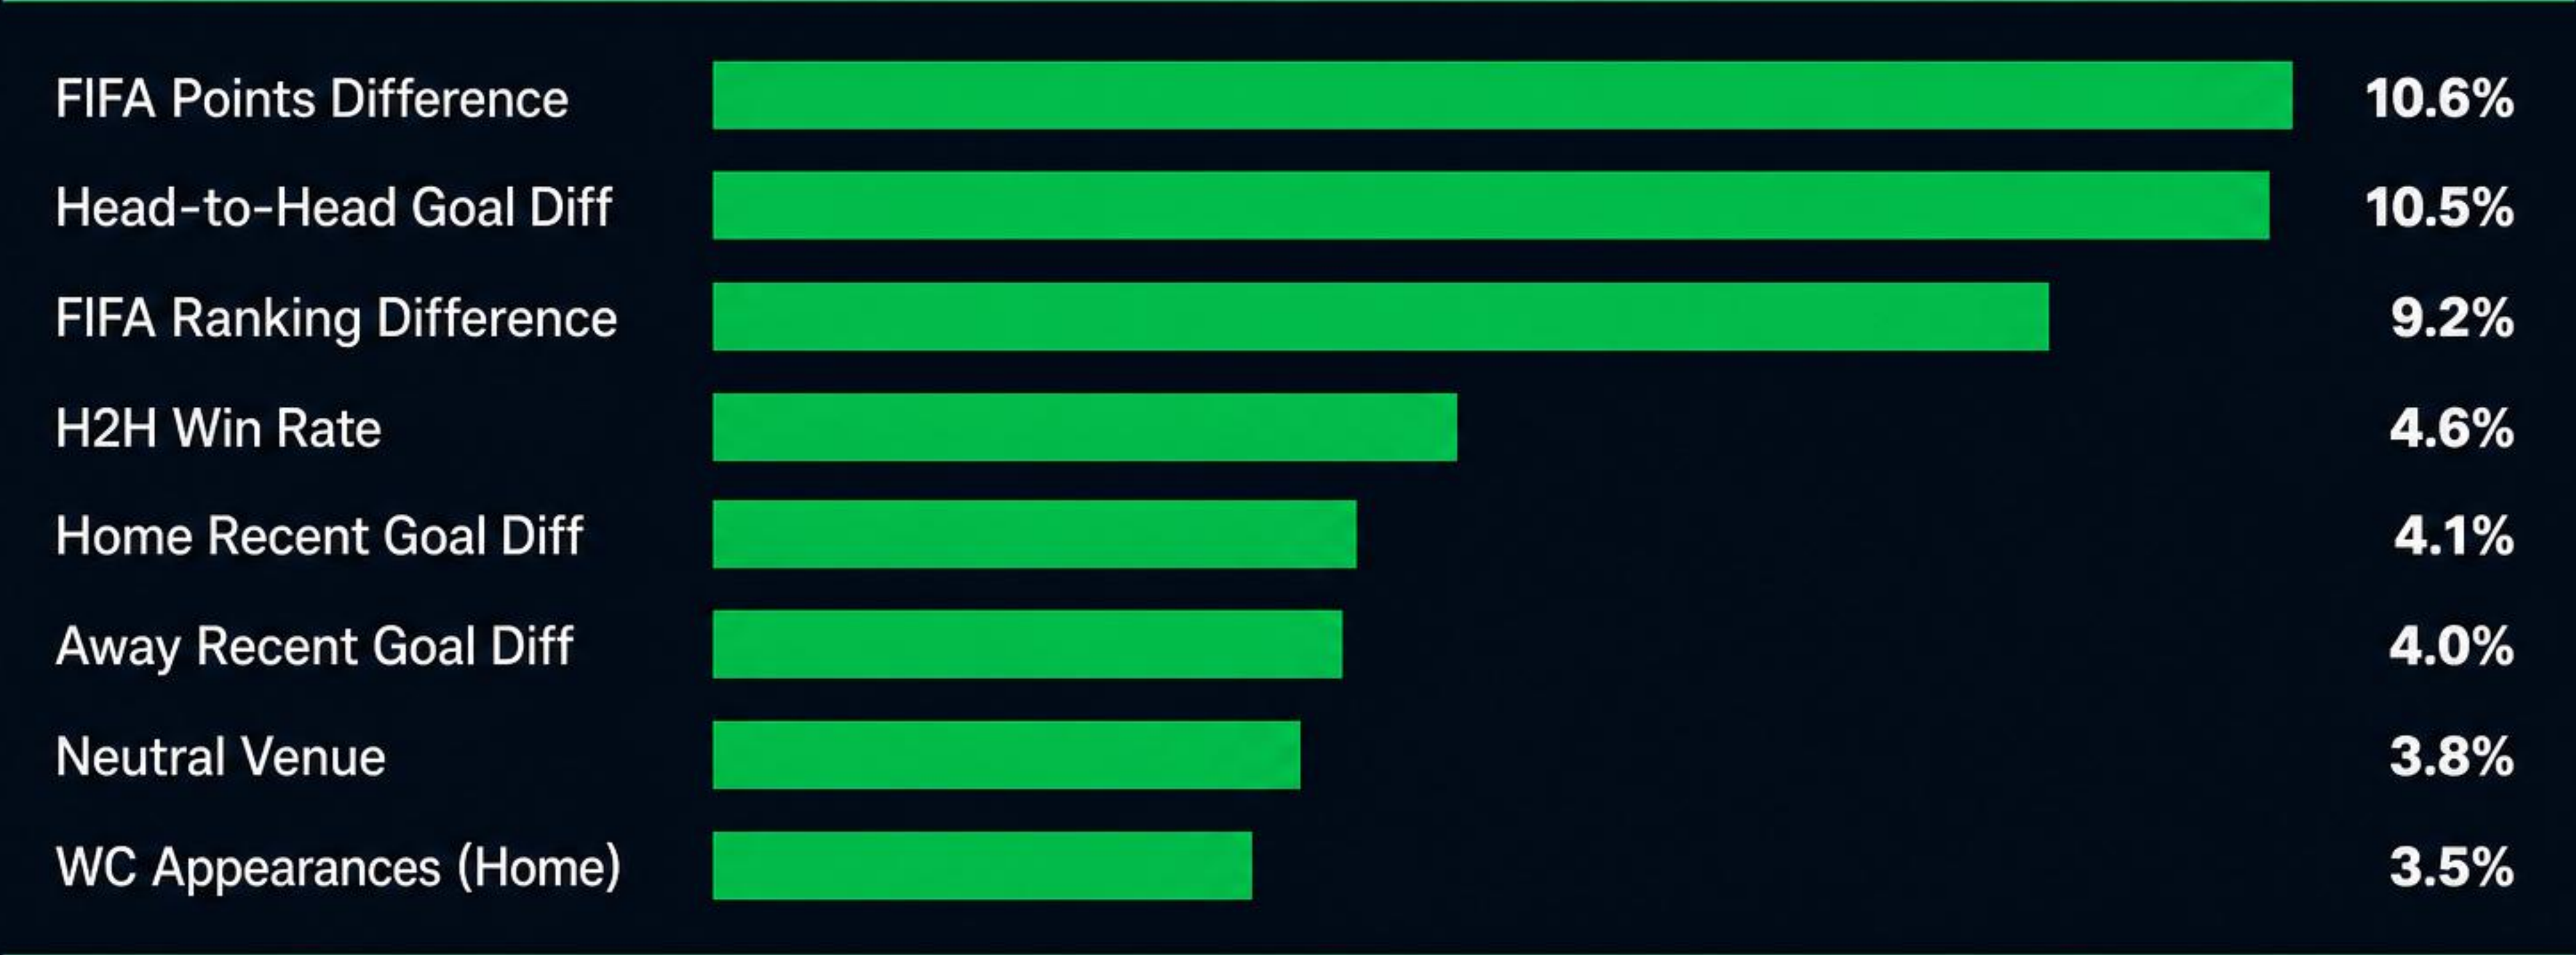

The full podium

Who does the model back to lift the trophy?

What the model learned

Top signals from 21,325 competitive matches

62.1%

Accuracy

0.775

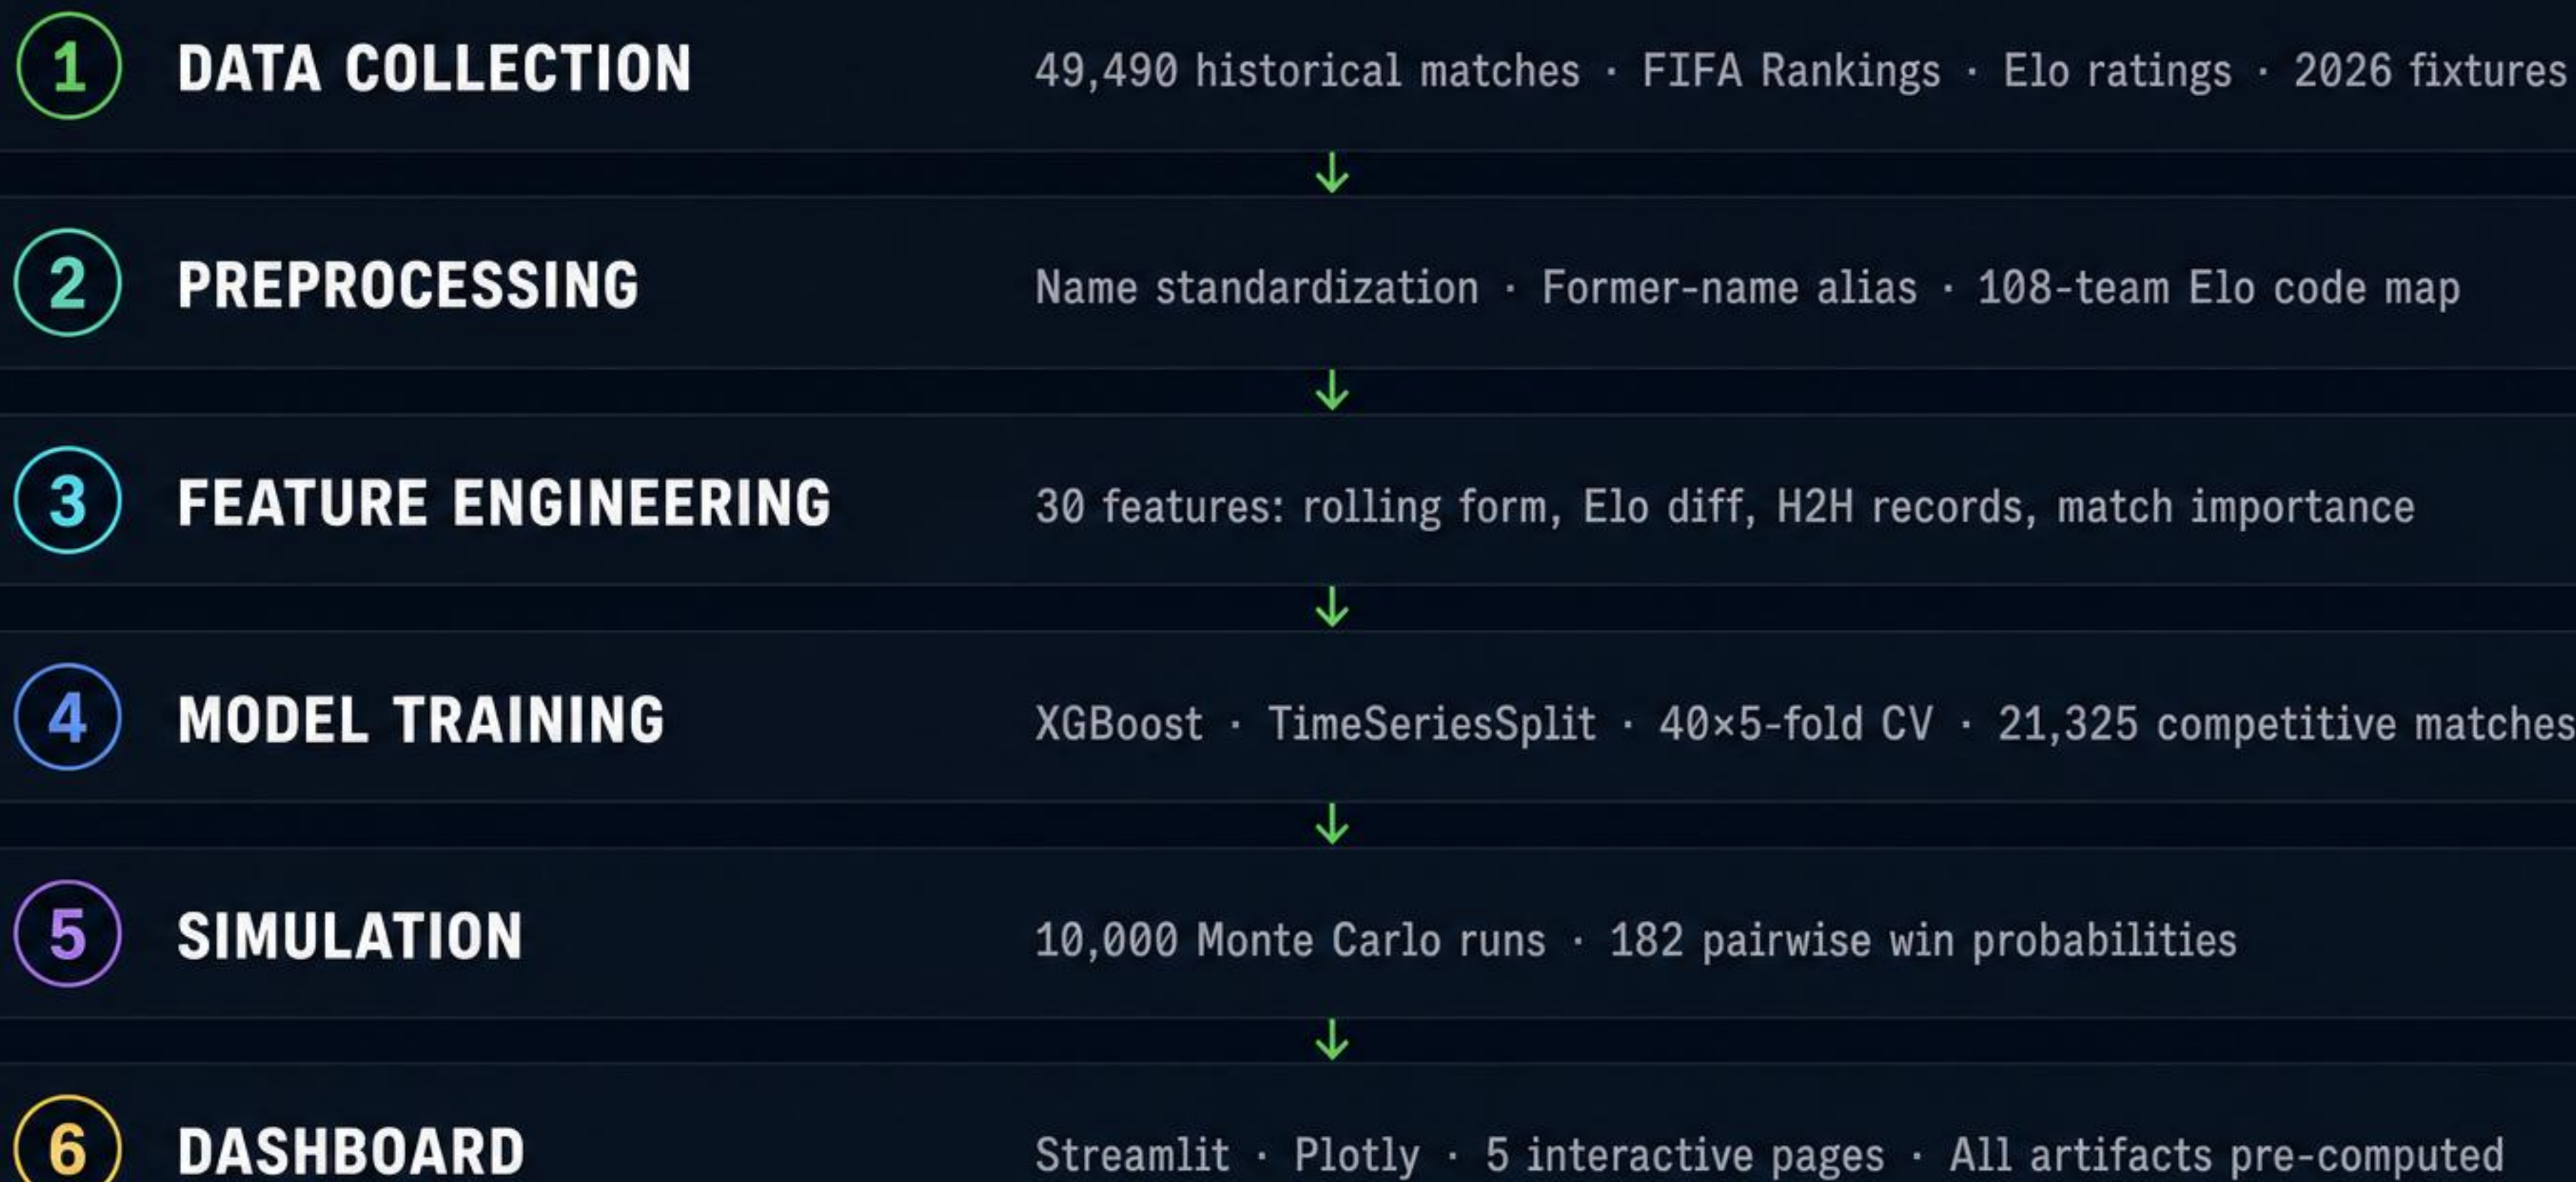

ROC-AUC

0.851

Log Loss (lower=better)

How it was built

From raw data to live dashboard – all in Python

Try it yourself

Everything is open source — code, notebooks, and live dashboard

LIVE DASHBOARD

Interactive Predictions

Match predictor · Simulation results ·
Model performance · Feature insights
